BSc in Computer Science, Year II, Semester I
Autumn 2020
PLT202: Object Oriented Programming Using Java
Lab Exercise 5
Release Date: 3-November-2020

1. Create an interface, **Bendable,** with one method, **bend.** Create two classes, **Spoon** and **Arm,** which implement **Bendable. Spoon** will also have an **eat** method, and **Arm** will also have a **raise** method. Each of these methods prints a message indicating its function. Write another class with a main method, declaring two objects of type **Bendable,** one a spoon and another an arm. **[5]**

2. Write a program in Java which implement interface Student which has two methods **Display_Grade** and **Atrendance** for PG_Students and UG_Students(PG_Students and UG_Students are two different classes for Post Graduate and Under Graduate students respectively). **[5]**
